

GAME RULES

➤ GAME COMPONENTS

Board, 4 player tokens, "Is it true?", "Your choice" and "Mystery" cards.

➤ NUMBER OF PLAYERS

Up to 4 players.

➤ HOW TO PLAY

Players must decide among themselves which player token colour they will use and the order in which they will play.

The spaces on the board are marked with the symbol of each card deck. As the game progresses, players must draw cards from the decks that correspond to the space their token is on. Each card offers a reward if the player answers correctly, and a penalty if they answer incorrectly.

Since the questions and answers are written on the cards, the player immediately ahead of the current player is responsible for reading the question aloud.

In the first round, all players must draw a card from the "Your choice" deck. If the player answers the question correctly, their token must perform the reward indicated on the card. If they answer incorrectly, the player remains at the starting space and their turn ends.

The first player to reach the Finish space wins the game
