

MUDDY MATE RULES

This game can be played by **2 to 4 players**.

Participants need to find definitions that match key concepts or terminologies related to soil formation with their definitions.

Definition cards are **pink** while **concept and terminology cards** are **orange**. Shuffle both sets of cards individually.

Concept and terminology cards (orange) are placed facing up in a grid pattern, while Definition cards (pink) are kept in a pile with definitions facing up.

Each player turns over a Definition card from the top of the pile and try to find the matching concept card pair.

The back of both sets of cards are numbered, so that correct matching pairs can be identified. If a correct match is made the player keeps the pair. Otherwise Definition cards go to the bottom of the pile and Concept and terminology cards go back to their place facing up.

The player with more matches wins the game.
